

Nejra Čorić

Mobile Developer

About Me

Two years of experience as a software developer, mostly focused on iOS. Knowledgeable about the most recent coding development standards and ethics, as well as agile development processes. Expanding my skill set on a constant basis. I always strive to give every task I am given my all, and I think that 99% of issues can be resolved with effective communication between coworkers.

Work Experience

March 2023 - present

AppDelegate

FitByLevelUp (Flutter)

Maintained a Flutter fitness app, regularly adding client-requested features, which allows users to access various workouts and challenges.

Links: [Fit by LevelUp \(iOS\)](#), [Fit by LevelUp \(Android\)](#).

SK4Tactic (Android & iOS)

The SK4Tactic system offers detailed training session info with integrated directions, provides guest and registered user access, displays transparent pricing, offers a convenient cart for ordering weapons and ammunition, includes user profiles with membership card details and password change options, and tracks comprehensive order history and statuses.

JapanAuto (Android)

- Secure email login for a personalized experience.
- Access to order history and employee details.
- Easy note creation, editing, and date-based organisation. Simplified business operations for owners.

Links: [JapanAuto \(WebPage\)](#).

Reserve.hr (iOS)

The Reserve.hr platform offers comprehensive reservation services for restaurants, boat tours, and rental services. It provides seamless booking details, integrates real-time navigation for each service, and allows access for both guests and registered users. The platform displays transparent pricing, making it easy to view and compare costs.

The app has not been published on the stores yet, but I can provide images showcasing its design and functionality afterward.
